- Undergone a Python Full Stack Developer Intern at UNIQ Technologies.

Project

Food Ordering website

- The Online Food Ordering System is a web-based application developed using the Python Django framework. The primary objective of this project is to provide users with an easy-to-use interface to browse and order food from a variety of restaurants while offering restaurant owners a platform to manage their menu, track orders, and interact with customers.
- Language Used: Python, HTML, CSS, Javascript
- Framework:Flask
- Tool Used: VS Code

Banking Management System

- Designed and developed a Banking Management System using Python and Django, enabling secure and efficient financial transactions. Implemented features for account management, deposit/withdrawal, and fund transfer using Django's ORM. Successfully deployed a user-friendly web interface for banking operations, ensuring scalability and reliability
- Language Used: Python, HTML, CSS
- Framework:Django
- Tool Used: VS Code

Certificates

- Successfully earned the “Problem Solving (Basic)” online certification from HACKER RANK.
- Completed “Introduction to SQL” online certification from SimpliLearn.
- Obtained the “Cloud Computing” and “Fundamentals of AI” online certifications from NPTEL.
- Acquired the “Python Programming” online certification from SimpliLearn.
